Windows

Linux

Install

For Linux install myStudio

Download the Linux version of myStudio from the official website to get an installation package as shown below

Select `myStudio-latest.AppImage` with the right mouse button to open it, click `Properties` to open it

Click to enter `Permissions`

In the `Permissions` page, check `Allow executing file as program`, and then click the `Close` button to close the pop-up window

After closing the pop-up window, double-click the installation package `mystudio-latest.AppImage` to open myStudio

For Windows install myStudio

Double-click to open the file named `mystudio_Setup_Latest.exe`, and click to `Run`

click `Next>`

After clicking `Install`, wait for myStudio installation to complete

The installation is complete, click the **Finish** button to open and run myStudio

For MacOS install myStudio

Download the Mac version of myblockly from the official website to get an installation package as shown below. Double-click to open it.

Note: For MacOS, make sure system "Preferences->Security & Privacy->General" and Allow Apps from App Store and Recognized Developers are enabled before installing.

Uninstall

For Linux systems uninstall myStudio

Just delete the installation package directly

The default name of the installation package is `mystudio-latest.AppImage`

Uninstall myStudio for Mac

Just move myStudio to the Trash in the app

Uninstall myStudio for Windows systems

Enter the file directory of myStudio and click to run `Uninstall myStudio.exe`

Click **Next>**

myblockly has been uninstalled, click **Finish** to exit

Update

In myStudio you can click the `Update` button to update
